Position - part Sun / part shade

Our most enduring basket range.

Provided in a plastic hanging basket, larger than the standard size.

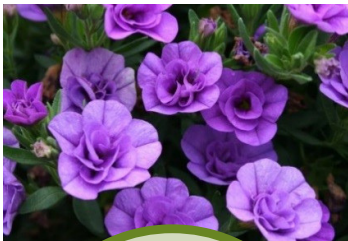

The petunias we use are all CUTTING RAISED so are stronger & perform better throughout the season.

Although petunias love a SUNNY SPOT they also LOVE TO DRINK, so to keep your basket looking its best it must be watered every day and thoroughly.

DEADHEADING the old flowers is also important with this basket as less fresh buds will be produced if the old ones are not removed.

Calibrachoa baskets are an easier care option than Petunias. They are more drought tolerant and require less deadheading. But are equally as stunning as their Petunia cousins.

Provided in a plastic hanging basket, larger than the standard size.

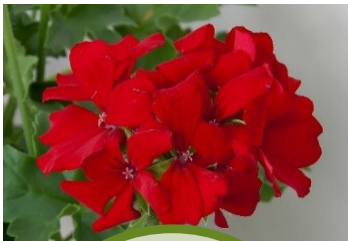

They come in a super range of colours, including novelty and double flowered varieties

- Produced in a 14" wicker basket – top planted.
- Prefers a shady position, the plants could scorch if in direct sunlight on a hot day.
- This basket is fairly low maintenance in that the flowers fall off themselves when they are finished.
- ‘Loud, brash and beautiful!’...the flowering longevity of this basket is amazing – it will be the best looking thing in your garden in September and that is why it is such a popular basket.
- Comes in a selection of bright fruity colours.

- The most drought tolerant basket that we offer!
- Produced in a 14" wicker basket
- A single flowered variety which will not suffer in the rain.
- Loves a sunny position

£20

£20

- A great innovation in hanging basket production, each 'Trixi' plug contains 3 different plants chosen for their compatibility with each other.
- Our 'Trixi' range is produced in a 14" wicker basket, top planted.
- We have 6 different mixes in our 'Trixi' range
